

Integrated construction site security throughout the UK

Optimum security

for secure project delivery

STAG SECURITY SERVICES ARE RECOGNISED AS ONE OF THE UK'S LEADING SUPPLIERS OF PREMIUM INTEGRATED SECURITY SOLUTIONS ON MAJOR CONSTRUCTION PROJECTS THROUGHOUT THE UK

Intelligent, innovative,
integrated,
cost-effective

From a standing start in 2002, we've grown rapidly to achieve approved, preferred or sole supplier status with more than 150 of the country's top construction companies...

...by innovating every step of the way.

In our unwavering commitment to recruiting staff of the very highest calibre; in our constant worldwide search for the latest security technology; in our dedicated drive to offer best practice alongside best value to every client, we never stop looking for ways to improve and refine the services we offer.

As a result, you can rely on Stag for proactive, leading-edge, technology-based solutions to every security issue the modern construction site faces.

The price of funding professional, effective security is massively outweighed by the costs to be borne when theft and vandalism go unchecked. And with the ancillary benefits of helping you to deliver to deadlines and meet Health and Safety commitments while enhancing your company's reputation, this is one investment well worth making.

THERE'S NO ASPECT OF MODERN CONSTRUCTION
SITE SECURITY THAT WE CAN'T PROVIDE –
THAT'S WHAT WE MEAN BY FULLY-INTEGRATED

360° security provision

24-hour freephone 0800 825 0502

Nationwide

Coverage from our Harrogate HQ and our London offices lets us spread our net nationwide. Working closely in partnership with you, we'll create the optimum security provision for any site, anywhere in the UK, including:

- SIA licenced security officers
- ROSPA trained traffic marshals
- SIA licenced CCTV operators
- SIA licenced dog handlers
- GPRS real time guard tour systems
- Biometric access control systems
- Remote monitored CCTV systems
- Health and Safety management software solutions
- Mobile Ford Transit welfare vehicles
- Access control cabins
- Manual and electric vehicle barriers
- Static guard cabins
- Mobile patrol and response units
- Mobile and remote monitoring solutions
- Radio communication networks
- Remote lone worker management
- Temporary fencing hire
- Complete site telecoms solutions

Protecting the build – meeting
your health and safety needs

24-hour control room,
monitoring security on your
site 365 days a year

Technology: the third eye

INVESTING HEAVILY IN INNOVATIVE TECHNOLOGY HAS ALLOWED US TO EXTEND OUR REACH AND IMPROVE OUR EFFICIENCY BEYOND RECOGNITION

Careful weighing up of the options, and the adoption of only the best of what's on offer where it meets a carefully defined need, keeps us right at the forefront of construction security.

For us, technology works two ways. Looking outwards, it's integral to professional site protection. Looking inwards, it allows us to check on our staff to ensure they're safe.

Our systems also allow us to mark and record our staff's attendance and the performance of their duties – your remotely-monitored, tamper-proof validation of our contribution to your site's security and guard welfare management.

Guarding the guards

GSM communications

Essential for on-site contact from our security officers. Our phones allow contact with our automated Timelink book on/book off system and enable hourly check calls for lone workers.

Active Guard

This unique and revolutionary patrol system is the first in the world to combine three functions in one: GPRS, NFC and GSM technology. The handsets allow for full monitoring of worker time and attendance in real time with data transmitted via the GSM and GPRS networks.

They also carry a Panic Button function giving lone workers instant control room contact in case of emergencies and a radio for two-way control communication.

Guard Monitoring Cameras

Positioned in security cabins or mobile welfare units, these devices use the GSM network to transmit pictures taken hourly back to the control room to double-check on security officers' attendance and performance. The cameras can also take pictures in response to a communication failure or a missed check call.

Guarding the site

Biometric Access Control

We use Ingersol Rand hand readers for state-of-the-art access management. With no cards to use, lose or mis-use – as with proximity systems – we can ensure that only authorised entry from individuals or contractors is allowed and we can also provide accurate attendance reports. Fast, efficient, cost-saving technology in action.

CCTV Cameras

Poor performance from lesser models has led to us specifying professional-standard CCTV equipment only. Our chosen model is the very latest Samsung Techwin high-speed PTZ camera with up to 444 x sharp zoom and low light imaging performance – ideal for construction projects.

Redwall V Motion Sensors

Combining five technologies into a single detector, the Redwall V delivers unparalleled detection capability. Each one is equipped with intelligent sensors that constantly analyse outside conditions to give optimum performance at all times.

CCTV Activation Monitoring

Through one of the UK's leading alarm monitoring stations, accredited by the National Security Inspectorate. The operation adheres to BS8418 which qualifies it for a URN – without which a Level 1 police response is not guaranteed.

Securing the latest technology

Our team – our greatest asset

WHILST TECHNOLOGY IS VITAL TO OUR OPERATION – WE ARE VERY MUCH A PEOPLE BUSINESS AND OUR HARD-WON REPUTATION RESTS HEAVILY ON THE SHOULDERS OF THE PEOPLE WE EMPLOY

Professionals on your site... and on your side

Our team of 50 contract support staff, operations managers and guard support managers is a dedicated community of professionals – their commitment to the job and to us has meant high officer retention rates, a testament both to the quality of the work they do and to the value they represent to servicing our clients.

Our 500+ security officers are of the highest calibre possible. The recruitment process is a vigorous one, highly detailed and always involving face-to-face assessment and testing.

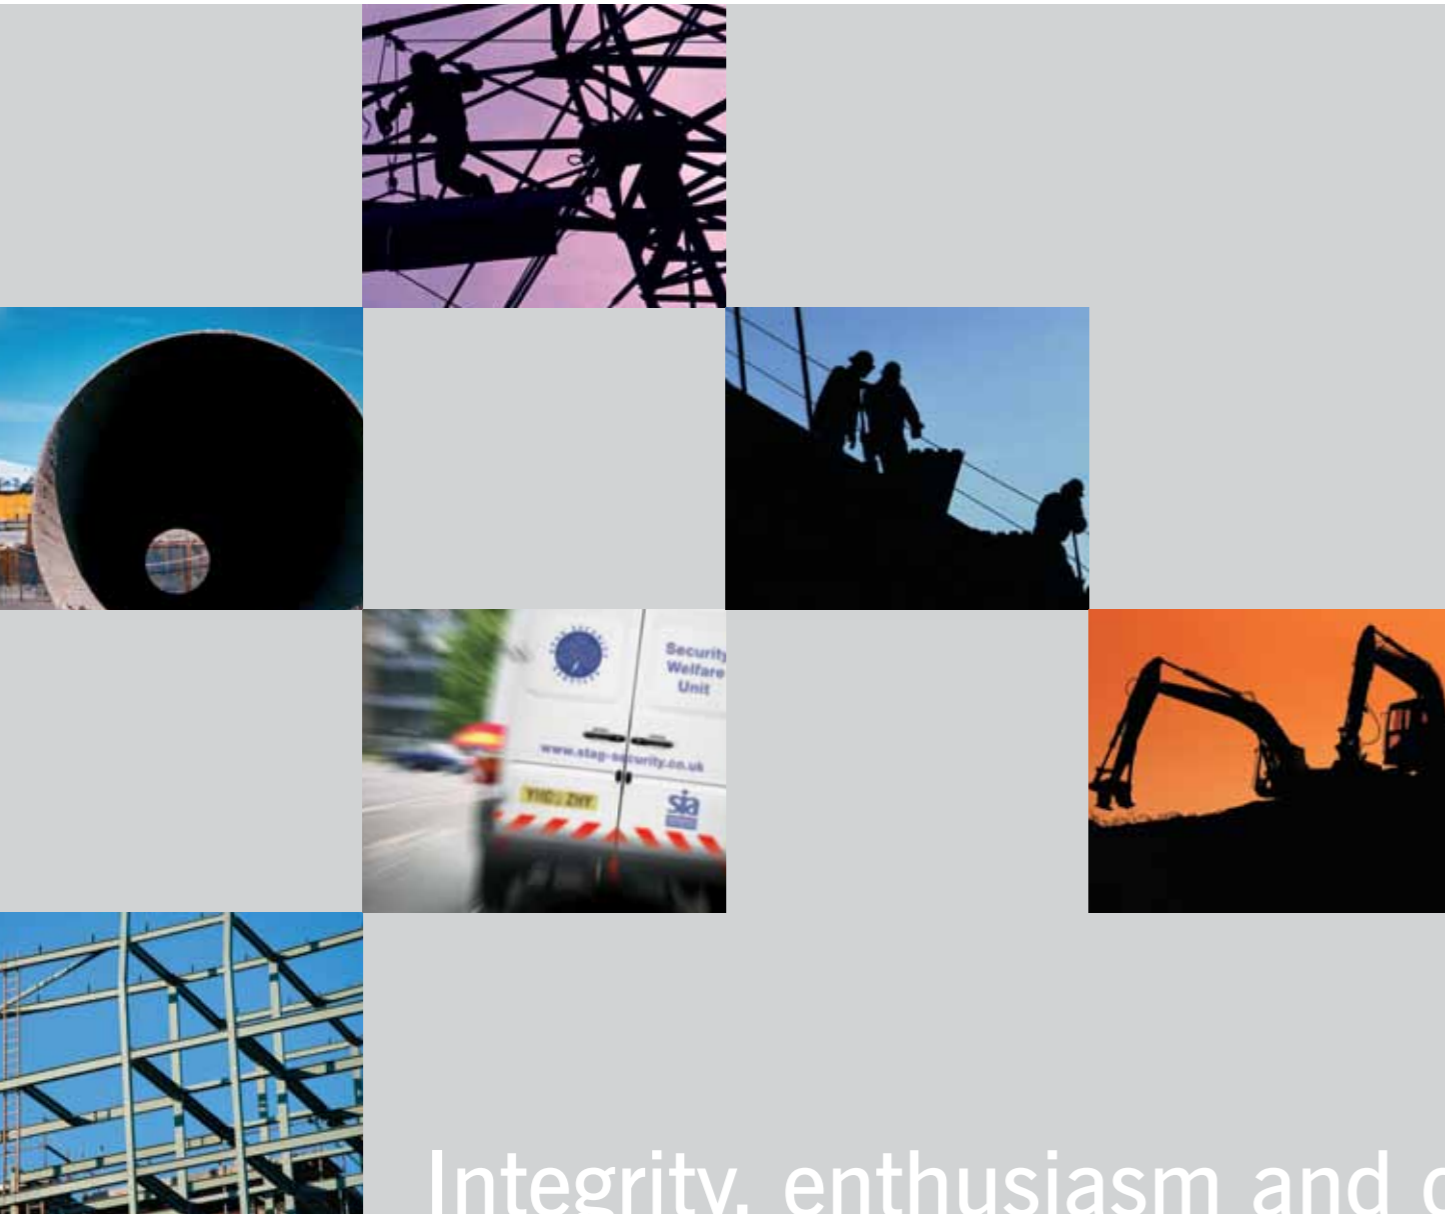

Each and every successful candidate undergoes extensive site induction and company familiarisation training to BS7499 standard. As with all of our site-based staff, they take industry-recognised Health and Safety courses and their knowledge and understanding of Health and Safety on-site is thoroughly assessed through CSCS card testing.

As part of our forward-thinking approach, we have introduced NVQ training schemes for all security officers, supervisors and managers, and we are delighted and encouraged by the positive take-up.

In addition, we run employee incentive schemes to further encourage and financially reward good timekeeping, attendance and performance – with further rewards given out based on no-holds-barred client appraisals.

As a result of all this, you can rest assured of the vigilance and dedication of an approved, licensed, uniformed and professional security presence.

Integrity, enthusiasm and commitment to clients and to ourselves

WE'RE FULLY CONFIDENT IN OUR ABILITIES AND EXPERTISE IN SPECIALIST CONSTRUCTION SITE SECURITY – WE ALSO UNDERSTAND THE CARE WITH WHICH YOU SHOULD DECIDE WHO TO GIVE THOSE RESPONSIBILITIES TO

Independently adjudged – and

approved

The credibility

We are one of a select group of security companies to achieve Approved Contractor Status from the SIA. ACS accreditation is one of your guarantees of quality.

We meet all the requirements of: ISO9001, BS7499 and BS7585.

We place great emphasis on our knowledge of up-to-date health and safety legislation and equal importance on its implementation – we're accredited within the Contractors Health & Safety Assessment Scheme (CHAS).

Our QM systems are currently being reviewed to achieve accreditation to: ISO9001:2008 and ISO14001:2004.

The clients

We're proud to hold approved, preferred or sole supplier status with more than 150 leading construction companies and have provided support on more than 500 major projects nationwide.

Award-winning customer service

Ensuring that we deliver the very highest standards to our valued customers is at the core of everything we do. Our CRM strategy – Customers Really Matter – is all about identifying the little issues and resolving them quickly to deliver service excellence.

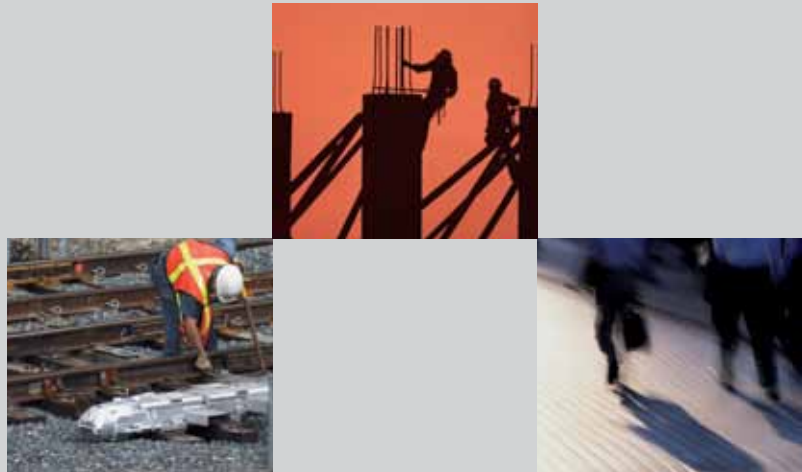

Our commitment to delivering outstanding customer service was formally recognised in 2009 at the National Security Excellence Awards where we took the prize for Customer Care Initiative of the Year 2009.

Stag Security proudly sponsored the 2009 and 2010 Quality In Construction Awards.
